

SUITABLE FOR ALL
PRINZING PFEIFFER MACHINES

For a modern industrial control system requiring advanced display, high performance, and excellent integration capabilities, Siemens panels are offered for all PRINZING PFEIFFER equipment.

SIEMENS PANELS

OFFER THE FOLLOWING ADVANTAGES

■ Advanced Display Technology

15 or 21-inch TFT or Full HD displays, with high resolution and detailed interface for monitoring and control.

■ User-Friendly Interface and Software Integration

Seamless integration with Siemens PLCs, drives, and other devices. This user-friendly software platform enhances engineering efficiency and reduces development time.

■ Capacitive Multi-Touch Capability

Resistive touch or multi-touch gestures, such as pinch-to-zoom, swipe, and rotate, providing intuitive, tablet-like control.

■ Greater Connectivity Options

A wide range of communication protocols, including PROFINET, Ethernet, Modbus TCP, and OPC UA are supported. This makes panels highly versatile for connecting to various systems and devices in industrial environments.

■ Modularity and Customization

Extensive customization options for visualizations and control layouts, ideal for users who need a high degree of personalization.

■ Durability and IP Rating

High ingress protection (IP65 or higher), ensuring durability in industrial environments that may be dusty or wet.

■ Warranty and availability

Immediate technical support, fast delivery times.
